```java
 1 package virtualKey;
 2
 3 public class DisplayClass {
 4     public static void welcomeMessage(String a) {
 5         System.out.println("Welcome to LockedMe.com \nDeveloped by "+a+" \nPress \"S\" to
   continue");
 6     }
 7
 8     public static void MainOptions() {
 9         String string = "Press \"1\" , \"2\" or \"3\" for\n"
10                 + "1 to Display File name \n2 to Display Other Options\n"
11                 + "3 to Exit";
12
13         System.out.println(string);
14     }
15
16     public static void OtherOptions() {
17         String string = "Press \"1\" , \"2\", \"3\" or \"4\" for\n"
18                 + "1 to Add a File \n2 to Delete a File\n"
19                 + "3 to Search a File \n4 to Go to Main Menu";
20
21         System.out.println(string);
22     }
23
24     public static void PrintFiles(String[] string) {
25         if(string == null) {
26             System.out.println("No File is present in Main Directory");
27         }
28         else {
29             System.out.println("Files in Main Directory are:-");
30             for(String s : string) {
31                 System.out.println(s);
32             }
33         }
34
35     }
36
37
38
39 }
40
```
